

Partner XE™ Hardware Specifications

*Always Searching for Ways to Serve You Better,
SIS is More Than Just a Software Company*

Workstation Platforms Supported

- Windows 2003
- Windows XP
- Windows Vista (32-bit & 64-bit)
- Windows 7 (64-bit) – using Windows XP SP3 compatibility mode
- Mac OSX with Parallels Desktop® (Windows XP, Vista, or Windows 7)

NOTE: Each platform should be kept current to the latest service pack.

Hardware Requirements

Recommended Workstation Equipment:

- Intel Core-Solo 2.0 Ghz (or Higher)
- 2 GB RAM (or Higher)
- Hard Drive with at least 500 MB free space
- 8 MB video card (or Larger) – Capable of displaying 1280X1024 in 16 bit color
- 17” Monitor (or Larger)
- 10/100 MB Ethernet Network Card (Name Brand)
- Must pass Windows Genuine Advantage (WGA) checks from Microsoft <http://www.microsoft.com/genuine/>

Minimum Workstation Equipment:

- Intel Core-Solo 1.2 Ghz
- 1GB RAM
- Hard Drive with at least 500 MB free space
- 8 MB video card (or Larger) – Capable of displaying 1024X768 in 16 bit color
- 15” Monitor (or Larger)
- 10/100 MB Ethernet Network Card (Name Brand)

Internet Connectivity

- Workstations must have access to a dedicated broadband “always on” Internet connection (DSL/Cable/Satellite/T1).
- Run the below speed test to ensure optimum system response time
 - » From your Internet Browser, enter <http://cst01.partnerxe.com>
 - » Click Begin Test and verify the results are acceptable:
 - ♦ Download should be no less than 1500 Kbps
 - ♦ Upload should be no less than 500 Kbps

NOTE: If your results are not above the guidelines specified, you will need to contact your computer technician or ISP provider to inquire about how to increase your bandwidth to reach the designated speeds. Otherwise you will experience slower system response time.

Notes:

- Dial-up Internet connections from a workstation may work with limitations, but are not supported.
- Firewalls can prevent the communication software from downloading through direct internet connections and dial-up.
